

Research Study:

The Social Brain Toolkit Virtual Clinic

Do you have a traumatic brain injury / head injury?
Do you have difficulty with communication or conversations?

Join us to test a new service available to people anywhere in Australia.

The clinic will use the Social Brain Toolkit,
and aim to build communication skills after traumatic brain injury.

What does participation involve?

- The Social Brain Toolkit Virtual Clinic is a new service for **people with a traumatic brain injury and their supporters**.
- People will meet online with **student speech pathologists** (working under supervision) over **12 weeks** to build communication skills.
- Activities will include **scheduled online appointments** and further **practice tasks** between appointments.
- There will also be some **extra online appointments** to **check in** on your skills and hear your **feedback**.
- People will receive **gift cards** as a thank you for their time.
