

Creating Core Outcome Measures For Mobility in Traumatic Brain Injury Rehabilitation

Have you had a moderate-to-severe traumatic brain injury?
You may be eligible to participate in research to identify core outcome measures.

WHAT IS THIS STUDY ABOUT?

We are doing research to find out the best ways to measure the way people move after a traumatic brain injury to improve rehabilitation, research and funding for people with a traumatic brain injury.

ARE YOU ELIGIBLE?

You must be:

- Over 18 years old living in Australia
- Sustained your moderate-to-severe traumatic brain injury when you were 15 years or older
- Been discharged from inpatient rehabilitation within the last 5 years

STUDY REQUIREMENTS

- Share your rehabilitation experience in an interview
- Attend an online workshop with health professionals, researchers and rehabilitation funders to finalise the set of outcome measures
